

**REPORT TO CONGRESS
ON
SPECIAL WASTES FROM MINERAL PROCESSING**

Volume II: Methods and Analyses

Office of Solid Waste
United States Environmental Protection Agency

July, 1990

Volume I: Summary and Findings	
Volume II: Methods and Analyses	
Chapter	
1.0 INTRODUCTION	1-1
1.1 The Scope of the Mineral Processing Waste Exemption	1-1
1.2 Contents and Organization	1-3
2.0 METHODS AND INFORMATION SOURCES	2-1
2.1 EPA Data Collection Activities	2-1
2.2 Analytical Approach and Methods	2-3
2.2.1 Waste Characteristics, Generation, and Current Management Practices	2-4
2.2.2 Potential and Documented Danger to Human Health and the Environment	2-6
2.2.3 Existing Federal and State Waste Management Controls	2-19
2.2.4 Waste Management Alternatives and Potential Utilization	2-21
2.2.5 Cost and Economic Impacts	2-23
2.2.6 Summary	2-35
3.0 ALUMINA PRODUCTION	3-1
3.1 Industry Overview	3-1
3.2 Waste Characteristics, Generation, and Current Management Practices	3-2
3.3 Potential and Documented Danger to Human Health and the Environment	3-4
3.4 Existing Federal and State Waste Management Controls	3-12
3.5 Waste Management Alternatives and Potential Utilization	3-13
3.6 Cost and Economic Impacts	3-14
3.7 Summary	3-14

4.0	SODIUM DICHROMATE PRODUCTION	4-1
4.1	Industry Overview	4-1
4.2	Waste Characteristics, Generation, and Current Management Practices	4-2
4.3	Potential and Documented Danger to Human Health and the Environment	4-4
4.4	Existing Federal and State Waste Management Controls	4-10
4.5	Waste Management Alternatives and Potential Utilization	4-10
4.6	Cost and Economic Impacts	4-11
4.7	Summary	4-11
5.0	COAL GASIFICATION	5-1
5.1	Industry Overview	5-1
5.2	Waste Characteristics, Generation, and Current Management Practices	5-2
5.3	Potential and Documented Danger to Human Health and the Environment	5-4
5.4	Existing Federal and State Waste Management Controls	5-16
5.5	Waste Management Alternatives and Potential Utilization	5-17
5.6	Cost and Economic Impacts	5-17
5.7	Summary	5-18
6.0	PRIMARY COPPER PROCESSING	6-1
6.1	Industry Overview	6-1
6.2	Waste Characteristics, Generation, and Current Management Practices	6-4
6.3	Potential and Documented Danger to Human Health and the Environment	6-8
6.4	Existing Federal and State Waste Management Controls	6-42
6.5	Waste Management Alternatives and Potential Utilization	6-44
6.6	Cost and Economic Impacts	6-51
6.7	Summary	6-61
7.0	ELEMENTAL PHOSPHORUS PRODUCTION	7-1
7.1	Industry Overview	7-1
7.2	Waste Characteristics, Generation, and Current Management Practices	7-3
7.3	Potential and Documented Danger to Human Health and the Environment	7-3
7.4	Existing Federal and State Waste Management Controls	7-17
7.5	Waste Management Alternatives and Potential Utilization	7-18
7.6	Cost and Economic Impacts	7-22
7.7	Summary	7-22

8.0	FERROUS METALS PRODUCTION	8-1
8.1	Industry Overview	8-1
8.2	Waste Characteristics, Generation, and Current Management Practices	8-5
8.3	Potential and Documented Danger to Human Health and the Environment	8-8
8.4	Existing Federal and State Waste Management Controls	8-32
8.5	Waste Management Alternatives and Potential Utilization	8-37
8.6	Cost and Economic Impacts	8-39
8.7	Summary	8-48
9.0	HYDROFLUORIC ACID PRODUCTION	9-1
9.1	Industry Overview	9-1
9.2	Waste Characteristics, Generation, and Current Management Practices	9-2
9.3	Potential and Documented Danger to Human Health and the Environment	9-5
9.4	Existing Federal and State Waste Management Controls	9-18
9.5	Waste Management Alternatives and Potential Utilization	9-20
9.6	Cost and Economic Impacts	9-21
9.7	Summary	9-25
10.0	PRIMARY LEAD PROCESSING	10-1
10.1	Industry Overview	10-1
10.2	Waste Characteristics, Generation, and Current Management Practices	10-3
10.3	Potential and Documented Danger to Human Health and the Environment	10-5
10.4	Existing Federal and State Waste Management Controls	10-26
10.5	Waste Management Alternatives and Potential Utilization	10-28
10.6	Cost and Economic Impacts	10-33
10.7	Summary	10-41
11.0	MAGNESIUM PRODUCTION	11-1
11.1	Industry Overview	11-1
11.2	Waste Characteristics, Generation, and Current Management Practices	11-3
11.3	Potential and Documented Danger to Human Health and the Environment	11-4
11.4	Existing Federal and State Waste Management Controls	11-8
11.5	Waste Management Alternatives and Potential Utilization	11-9
11.6	Cost and Economic Impacts	11-9
11.7	Summary	11-14

12.0	PHOSPHORIC ACID PRODUCTION	12-1
12.1	Industry Overview	12-1
12.2	Waste Characteristics, Generation, and Current Management Practices	12-3
12.3	Potential and Documented Danger to Human Health and the Environment	12-5
12.4	Existing Federal and State Waste Management Controls	12-32
12.5	Waste Management Alternatives and Potential Utilization	12-36
12.6	Cost and Economic Impacts	12-47
12.7	Summary	12-58
13.0	TITANIUM TETRACHLORIDE PRODUCTION.....	13-1
13.1	Industry Overview	13-1
13.2	Waste Characteristics, Generation, and Current Management Practices	13-3
13.3	Potential and Documented Danger to Human Health and the Environment	13-5
13.4	Existing Federal and State Waste Management Controls	13-20
13.5	Waste Management Alternatives and Potential Utilization	13-22
13.6	Cost and Economic Impacts	13-23
13.7	Summary	13-29
14.0	PRIMARY ZINC PROCESSING	14-1
14.1	Industry Overview	14-1
14.2	Waste Characteristics, Generation, and Current Management Practices	14-2
14.3	Potential and Documented Danger to Human Health and the Environment	14-4
14.4	Existing Federal and State Waste Management Controls	14-17
14.5	Waste Management Alternatives and Potential Utilization	14-18
14.6	Cost and Economic Impacts	14-20
14.7	Summary	14-25
	GLOSSARY	G-1
	Volume III: Appendices	

Table of Contents

		<u>Page</u>
Volume III: Appendices		
APPENDIX A	History of the Mining Waste Exclusion for Mineral Processing Wastes	
APPENDIX B	EPA Data Collection Activities	
B-1	Description of the 1989 National Survey of Solid Wastes from Mineral Processing Facilities (SWMPF Survey)	B-1-1
B-2	Description of 1989 EPA Sampling and Analysis Activities	B-2-1
B-3	List of Facilities With Documented Cases of Damage from Mineral Processing Waste	B-3-1
B-4	Example of RCRA §3007 Data Request	B-4-1
B-5	List of Published Reports, Papers, Abstracts, and Data	B-4-1
APPENDIX C	Risk Assessment Criteria and Model	
C-1	Risk Assessment Screening Criteria	C-1-1
C-2	Summary of MMSOILS Model	C-2-1
APPENDIX D	Existing Regulatory Controls	
D-1	Existing Federal Regulatory Controls Addressing Mineral Processing Wastes	D-1-1
D-2	Existing Regulatory Controls Addressing Mineral Processing Wastes in Selected States	D-2-1
APPENDIX E	Cost and Economic Impact Assessment Methodology, Assumptions, and Results	
E-1	RCRA Subtitle C Statutory and Regulatory Provisions	E-1-1
E-2	Subtitle D-Plus Regulatory Program Scenario	E-2-1
E-3	Description of Cost Model and Assumptions	E-3-1
E-4	Sources of Market and Financial Data	E-4-1
E-5	Results of Financial Impact Analysis	E-5-1
